International Security Management Association's Director of Education & Knowledge Management  
Earns Certified Association Executive Credential

The International Security Management Association (ISMA), a premier international security association of senior security executives from major business organizations located worldwide, has announced that its Director of Education & Knowledge Management, Molly Jin, has earned a credential as a Certified Association Executive (CAE) from the Center for Association Leadership (ASAE).

To be designated as a Certified Association Executive, an applicant must have experience with nonprofit organization management, complete a minimum of 100 hours of professional development, pass a stringent examination in association management, and pledge to uphold a code of ethics. To maintain the certification, individuals must undertake ongoing professional development and activities in association and nonprofit management. More than 4,700 association professionals currently hold the CAE credential. The CAE program is accredited by the National Commission for Certifying Agencies (NCCA).

“We are so pleased for Molly and thrilled that she will continue to bring her knowledge and expertise to bear in ensuring that ISMA provides excellent education and professional development opportunities to its members and to future security industry leaders,” remarks Liz Chamberlin, ISMA Executive Director.

ISMA is a 501(c)(6) not for profit organization with a mission to provide members with a global, trusted, and unrivalled peer information sharing network, a forum for robust thought leadership, and relevant professional development.
